

Product Description

Briticom® access covers are primarily used to cover Telecom networks, but also for road signs, lighting, and other uses. They are modular, allowing for large openings that make intervention on underground equipment an easy task. These access covers are the most economical solution for chamber access.

Features & Benefits

- Hydro-soluble paint or galvanised stainless steel finish
- Adaptable
- Durable
- Interchangeable covers with previous models
- Cast iron hinges
- Steel locking bars
- Steel security pins

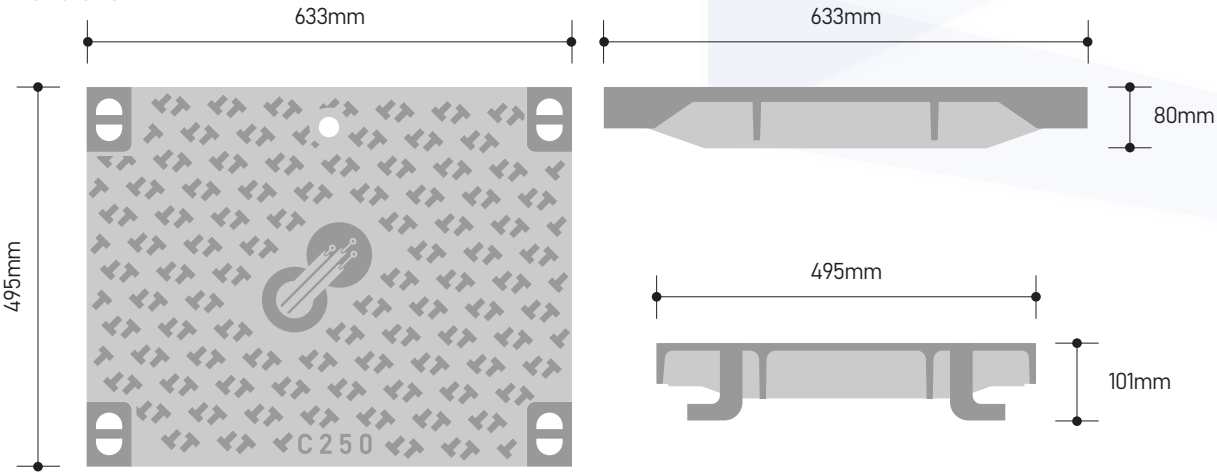

Applications

- Cable management
