

Product Description

The BCP® one-piece thermoplastic clamp consists of a closed conical-shaped body, a round wedge with an integrated lanyard and an opening bail. Thanks to its ruggedly engineered bail, the FTTH clamp is to be secured directly on pole fittings, with open or closed eyes, or on pole hardware.

As one of the professional fiber optic accessories suppliers, BCP® can customize the optical cable according to your requirements.

Features & Benefits

- Cost-effective, single-piece design
- Simple and fast installation requiring no tools
- Efficient cable grip by conical wedging
- Manual adjustment of the lowest point of the cable by blocking the wedge on the remote position
- Mounting on all pole line hardware with open or closed eye.

Applications

- Aerial cabling

Technical Specifications

Flat Cable size (hwxw) mm	<4x<8
Round cable size mm	2.5 - 5
Product Material	UV resistant plastic
Span	30 - 50 m
MBL	0.5kN
Design	Anti-Drp wire bail
