

Product Description

BCP Cable Trays are regularly used to manage cabling inside a data rack, the ventilated tray has an imprint profile of various size and shape openings which allows for air flow circulation around the cabling and easy fitting of different size cable straps and cable bundles. Cables can be secured to the tray using either plastic, metal or Velcro cable ties, the profile design of the tray makes it easy to do so.

Features & Benefits

- Available in different size
- Available in different colours
